As owners of the property located above, Parcel ID 089D E 01100 00009089C, we respectfully request the BOMA and the FMPC members consider two facts regarding the development of Carothers Chase, located at 4338 & 4340 S. Carothers Rd, Franklin TN. They are:

1. There is a 40 foot decline on our property, and the Carothers Chase property behind our house to the first house in their new development. No provision for drainage in the proposed development plan exists to protect the Carothers Chase homes from this run-off. We, and the Bradley and Linda Wilson's home next to us, experience significant run-off problems during rains. We are concerned the run-off will not only affect the Carothers Chase homes adversely, but also impact the Wilson's significantly, and possibly our home if there is nowhere for this water to go. Currently, the water can continue to flow on its natural course, but after the new development it will be impeded by homes, and perhaps redirected by concrete. We are certainly not civil engineers, but we believe this concern should be examined.
2. The density of the homes in the Carothers Chase development is inconsistent with the density of those surrounding Cross Creek on the East side, namely Colletta Park. Additionally, these proposed homes are extremely close to the property line of the homes on Cross Creek Court, and there is no provision for a barrier wall or any privacy barrier between the two subdivisions. Please consider reducing the density of these Carothers Chase homes, and either expand the distance between the two developments, or provide a privacy barrier between the two.

We greatly appreciate your time and consideration of these matters, and hope you can find favorable solutions for all concerned. God bless.
