**PUBLIC MEETING**

Wednesday, August 29, 2018 at 10:00 AM

Name: Claudia Finnegan

Address: 704 Branch Ct. 37064

**COMMENTS:**

I am concerned about the lack of parking in the City. City vehicles consume a significant number of spaces in the 2nd Ave. location. ① Can they park in the old Shoe Factory on N. Margin? ② Lack of spaces is pressing visitors to park in yellow areas, on corners, etc. creating safety hazards. Can officers enforce these violations to avoid traffic hazards?

③ With reduced space & increased demands, can the City find another site for a multi-story parking facility?

④ Since the entire county & visitors use these spaces, can the county help pay for a new garage or seek a grant so residents don't have to bear the entire burden.

This is a problem growing exponentially! Meters won't eliminate it - just will be a parking ticket revenue source!

**COMMENTS:**

Firstly thank you so much for taking the time to host this. I wanted to bring to attention that i think it is of very high importance that we keep as much parking owned by the city free + accesible es possible. I believe it sets a kind/welcoming message from our community and also serves people very well. Thank you so much for not

→ Charging for city parking. I know it may be a tempting offer to monetize parking to increase revenue + turnover, but by keeping it free and accessible I believe it to be a kinder and very beneficial thing for the people who both visit, and work in Downtown Franklin.

I also ask that the new 2 hour limit be enforced with grace + leniency if it is to go into effect at all, to help the overall justice + spirit of the area.  
Thank you again for your time. -Hunt

We need a crosswalk between  
Frathy monkey & the steps  
behind the P.O. please!

Even on Sunday mornings it's  
a little dangerous crossing from  
Church to parking behind P.O.  
(which we have permission to use.)

Thank you!!

*ATTENTION COF staff: This email originated from outside the City of Franklin. Please use discretion when clicking on attachments & links from unknown senders or suspicious emails.*

Hello Paul and Jonathan,

Thank you so much for your excellent presentation last week regarding streets, striping and parking in Downtown Franklin. That was a comprehensive study of the situation and potential improvements. Thank you also for reaching out to the DNA to assist in improving this situation for residents, business owners and tourist. We are excited to be a part of the discussion.

Yesterday afternoon the Downtown Neighborhood Association board met and discussed your proposals. One message came loud and clear. The DNA would not be in favor of beginning the slippery slope of creating one-way streets unless they are absolutely necessary. Based on the day-to-day experiences of the people on the DNA board, Cummings Street does not fall into a category of "necessary". As a matter of fact, we believe the confusion of such a short street becoming one-way would more likely cause accidents that prevent them. As someone who walks and drives that short street regularly, I do not see a problem that needs to be ameliorated.

Also, as we briefly discussed in the meeting, there is a concern among residents who are losing parking in front of their homes. The increase in daytime parking on residential streets is likely due to the recent changes in parking options Downtown. The driving forces have namely been when previously free lots became paid lots and then the switch from 4-hour to 2-hour parking. To assist in creating solutions for residents, we put together an initial task force led by Walt Green to look at potential options to improve parking for residents. Specifically Mr. Green's group will be looking at other towns and cities that face similar situations to see how they have most effectively dealt with this problem. Mr. Green may add other interested parties to his task force.

Thanks so much for your concern for all of Franklin's citizens. I'm sure if you could wave a magic wand and multi-story, underground parking garages would materialize you would do that. In the meantime, we look forward to working together.

Best,  
Lynne

**PUBLIC MEETING**

Wednesday, August 29, 2018 at 10:00 AM

Name: Betsy Adgent

Address: 123 Lewisburg Ave.

**COMMENTS:**

E. Fowlkes St. is a major safety + traffic issue. Large trucks (even 18 wheelers) use it as a "cut-through". It does not need to be widened or improved (would result in more usage). Restriction of use by large truck/commercial/trailers would be a start.

Downtown Parking, Signage, &  
Pavement Marking Modifications  
**PUBLIC MEETING**

Wednesday, August 29, 2018 at 10:00 AM

Name: Kelly Baker-Hefley

Address: 905 Fair

**COMMENTS:**

The entire intersection at Fair & 7th needs stripping and reinforcement. Vehicles are parked too close to all sides of the intersection, which eliminates visibility & creates a narrow tunnel of cars. This intersection is off of Newque, and people don't/can't see the stop signs. It's also a residential neighborhood, which

has a lot of foot traffic. Additionally, there is a gym down the street who sends their clients running down the street (not to mention all the extra cars). I worry that someone will be injured or killed. This is a daily problem.
