**B. Reclaimed Water**

2. In the case of this Property, a 2,000-foot extension would be required to serve the Property. For this reason, reclaimed water will not be required to be extended to the Property.

2. The proposed development of the Property is anticipated to construct residential units.

5. The Owner shall be required to submit engineering calculations to determine final sizing requirements.
6. The Owner shall be required to provide Engineering design, construction, easements, rights-of-way, and the costs associated with the on-site sanitary sewer infrastructure required to serve the development of this Property.

2. Envision Franklin designates the Property as both Conservation Subdivision and Single Family Residential. The majority of the Property is designated as Conservation Subdivision, which supports primarily single family residential development that clusters lots and infrastructure and sets aside a substantial amount of property as permanently protected open space in its natural state. New development should preserve a minimum of 50 percent open space, strategically targeted toward scenic vistas, greenways, pastures, trails, woodlands, or other uses that maintain scenic character. The Single Family design concept allows for a range of single family dwellings and lot sizes and should transition from the existing development patterns in adjacent neighborhoods. Portions of the property are also within the Conservation design concept due to the existence of hilltops that warrant protection.
3. Upon annexation, the Property will be zoned by the Board of Mayor and Aldermen, pursuant to the requirements of the Franklin Zoning Ordinance with a base zone district, Overlay District, Character Area Overlay District, and designated as a Conventional or Traditional Area.
