

Downtown Neighborhood Association Priorities

2016

Answered: 64 Skipped: 2

What do you think should be the top priorities for the DNA?

Top 5 DNA Priorities

1. Support the application of historic zoning standards that require continued protection and retention of our historic structures, property values, and our neighborhoods.
2. Prioritize the streetscape improvements for pedestrian foot traffic on Franklin Road from downtown to The Park at Harlinsdale Farm and The Factory.
3. Support Bicentennial Park improvements and greenway connections to and within downtown.
4. Monitor the redevelopment of key downtown properties.
5. Participate in public discussions and offer a point of view in the upcoming city's downtown parking study and traffic related issues.

Are there any other priorities you think the DNA should address in the upcoming year that were not on the previous list?

- ▶ Riverwalk, plant grass at Bicentennial now for minimal expense
- ▶ Improve traffic flow and realistic affordable housing
- ▶ Redevelop Columbia Ave to ensure compatibility with adjoining residential neighborhoods, advocate for noise ordinance to prohibit amplified sound located within 100 feet of a residential lot.
- ▶ Better noise ordinance
- ▶ Streetscape improvements-Underground power lines on West Main Street, Sidewalk on Lewisburg to Carnton, better maintain current streetscape landscape beds
- ▶ Address ways to reduce speeding on Lewisburg Ave and add a traffic light to S Margin and 5th Avenue/Lewisburg Ave
- ▶ Monitor homes/condo developments that do not meet current standards
- ▶ Review and reevaluate basic tenets of the historic overlay zoning guidelines
- ▶ Publish monthly DNA letter with project status and schedule of events
- ▶ Support infrastructure BEFORE growth occurs and support developers fees to be increased accordingly
- ▶ Stop or limit infill in the historic overlay
