<p>Plan 4</p> <p>Defined contribution option</p> <ul style="list-style-type: none">401(k), 401(a) or 457 Plan	<p>4.1 State can provide local government entities three options: 401(k) plan, a fixed-contribution 401(a) plan and its supplemental 457 plans as employer options.</p> <p>4.2 Employers are free to design any benefit and contribution level available under the third-party administrator’s recordkeeping system.</p> <p>4.3 Maximum combined employer and employee contributions are subject to IRS limits.</p> <p>4.4 State will offer its defined contribution plans to local governments, but local governments may procure a defined contribution plan from any source.</p>																																	

This estimate of Normal Cost is based on current TCRS annual earnings assumption of 7.5%. Use of a lower earnings assumption will result in a higher normal cost. Normal cost is the portion of compensation (expressed as a percentage of payroll) that is being deferred in the current accounting year. This is one element of total pension cost which can increase due to multiple factors such as market losses in investments, future salary increases in excess of assumptions, and is not a guarantee of costs for a particular entity. Normal cost can only be determined by an actuarial study of a particular local government entity.
