### **PURPOSE / DESCRIPTION OF REQUEST**

Request is to establish three (3) Fire Safety Officer positions in order to have a fire investigator, a safety officer, and fire inspector available to respond 24/7 to accomplish the department's mission. The position is key to supporting the Battalion Chief on complex incidents and providing personnel safety and accountability. Additionally, the position will provide much needed fire inspection services such as issuing tent permits, open burning requests, and after-hours inspections including numerous weekend events.

This is salary grade G amount above reflects \$54,205 1st quartile.

ALL OF THE ONE TIME COSTS WOULD BE CHARGED TO THE FACILITIES TAX ACCOUNT.

### **SERVICE IMPLICATION**

This position is tasked with several significant roles. The department recognizes that a full-time safety officer, fire investigator, and fire inspector will not be assigned on a 24/7 basis. This position will reduce workload on current fire inspectors so they may focus on new construction. It will also improve the safety of personnel and a single position will be continuously focused on safety. Finally, an investigator will be on the scene to preserve evidence faster and begin conducting the scene investigation. All of these tasks happen on an ongoing basis. Failure to staff this position will likely result in increased false alarms, less effective fire investigations, and diverting the full attention of the existing fire inspectors for their new construction responsibilities.

## **PURPOSE / DESCRIPTION OF REQUEST**

Tower 1 will be 18 years old when it's replacement is complete. It is currently 3 years past its replacement date. This vehicle would remain in the fleet as a reserve for 5 additional years.

FY2018 - 25% or 250,000 down payment

FY2019 - 75% or 750,000 balance due at completion

FY2019 - 50,000 to purchase equipment to outfit the vehicle

## **SERVICE IMPLICATION**

To continue to delay the replacement of this vehicle jeopardizes our ability to maintain quality reserve apparatus, increases our maintenance budget, and subjects the vehicle to be unservicable due to the inability to obtain repair parts.

DIIDDOS	E / DESCRIPTION O	E DECLIEST		

Physio-Control provides the discontinuation dates after which they will no longer commit to repair, support or perform preventative maintenance for their product lines. The LifePak 12 discontinuation dates is September 10, 2016 or the date the product reaches eight years old. Four of our current units reached this date in September and October of 2016. We have two additional units that will reach this date in June and September of 2017. There is however an exception that if the units are covered under an existing service contract they will continue to be serviced. Our units are currently under a service contract through June 2019.

We are requesting to purchase two replacements per year over the next three years.

### **SERVICE IMPLICATION**

If Physio-Control will not agree to extend a service contract before July of 2019 each units not replaced will have reached their discontinuation date and therefore would be unusable for medical emergencies. Each apparatus not equipped with a servicable cardiac monitor would be downgraded from Advanced Life Support to Basic Live Support status thus affecting patient survivability outcomes.

TOTAL	\$416,000	\$8,000	\$424,000		

### **PURPOSE / DESCRIPTION OF REQUEST**

The apparatus will replace a staffed rescue vehicle at Station 3. It will broaden the abilities of our department to provide service to wildland-urban interface areas. These areas are characterized by challenging terrain, steep grades, and narrow driveways. The new pumper will have 4-person cab, 4WD, a short wheel base and overall length for excellent maneuverability, a 1000-gpm pump with pump and roll capability, a compressed air foam system, and a 500-gallon water tank. Additionally, it will be able to respond to on any structural fire and provide ALS medical response.

### **SERVICE IMPLICATION**

If this apparatus is not purchased it prevents Franklin from being able to serve many of the wildland/urban interface areas in the City. Additionally, it provides a second pumping apparatus to respond from Station 3 since Rescue 3 is scheduled for replacement and relocation to Station 2. This provides redundancy to the response model, allows better coverage of the response area during training, and reduces required move-ups of apparatus.

TOTAL		\$561,000	\$8,000	\$569,000	

## **PURPOSE / DESCRIPTION OF REQUEST**

This facilities tax request will provide a fire apparatus to enhance our response capabilities in the city, and more specifically to the temporary Fire Station 7's response district. This apparatus was originally slated to be purchased and delivered concurrent with the permanent Fire Station 7 due to be completed in approximately 2 years.

### **SERVICE IMPLICATION**

Not purchasing an apparatus for Fire Station 7 would require the utilization of one of our two reserve apparatus to cover the response area. Currently our reserve apparatus consistently remains in-service while service and repairs are performed on front line apparatus. By removing a reserve apparatus from inventory, the ability to provide an apparatus to back-fill for apparatus receiving normal service or repairs will be reduced.

	DUDDOCE	/ DESCRIPTION O	E DECUECT		

This request would add an enhanced ability to train for many types of special operations and technical rescues like confined space, urban search, high and low angle rescues and many more. As the city continues to grow, construction accidents, window washer mishaps, trench cut failures and the like become more probable. These types of rescues are extremely complex and manpower intensive requiring personnel who are continually maintaining and improving their skills. Our existing facility does not provide a means to conduct confined space training, nor does it provide for the safety of our personnel training in the other types of recues as this addition will afford us.

### **SERVICE IMPLICATION**

Failure to approve this enhancement would force us to continue to use uncontrolled, non city properties which raises our liability and risk. By adding this addition it will broaden our capabilities and allow for much more in-depth training on a regular basis, and thus not having to rely on outside resources for access to these needed props and fixtures. This addition would help keep our personnel on the cutting edge of the training needed to keep the City of Franklin and its citizens safe for years to come.

## **PURPOSE / DESCRIPTION OF REQUEST**

#### Estimated as Grade H

This request is to add a new fire inspector supervisor. This request reflects the need to provide more support to the three (3) fire inspectors. A supervisor will help provide field level consistency and monitor dynamic new construction projects. It will also help manage the timeliness of inspections when absences occur and provide a consistent contact for BNS supervisors to coordinate project approval.

### **SERVICE IMPLICATION**

Fire inspectors ensuring construction projects are completed in accordance with minimum fire and life safety code requirements. Even if new construction projects were to slow in the future, fire inspectors continue to enforce code requirements in all existing buildings in Franklin.

PURPOSE / DESCRIPTION OF REQUEST				

This request is to change the pay grade of one (1) Assistant Fire Marshal to exempt status in pay grade I. The exempt status better reflects the independent nature of the work performed and allows more flexibility to accomplish the department's goals in emergency response. Secondly, there are three pay grades between the Deputy Chief supervising this position. This change creates a more logical hierarchy and recognizes the importance of the AFM position within the division.

The AFM is currently tasked primarily to new development reviews through the Development Review Team. Additionally it creates a clear second in command for daily decision making that is commensurate with the responsibilities of the Fire Marshal.

### **SERVICE IMPLICATION**

Service implication is overtime costs increase and a lack of a defined hierarchy within Fire Prevention. Additionally, this request is related to a PER to add a Fire Inspector Supervisor which should be classified above Fire Inspector (Grade G) and would be in the same Grade as the current AFM position (Grade H).

### **PURPOSE / DESCRIPTION OF REQUEST**

An apparatus camera system will enhance safe vehicle operations by providing sight in areas that are considered blind spots. This system would also perform automatic recordings and can be used to protect the employee and the city against frivolous lawsuits as a result of a vehicle accident. The camera system will also be used in emergency operations to provide greater firefighter safety, more effective elevated water system management and enhanced situational awareness by providing for an aerial view of the incident scene by the incident commander and those operating the apparatus.

The request is to outfit our three tower trucks and our Battalion Chief's Vehicle.

### **SERVICE IMPLICATION**

Failure to fund this request puts our apparatus operators at greater risk for accidents and reduces the ability of the city to refute actions that occurred during vehicle accidents. Apparatus Operators will continue to experience blind spots that hamper safe vehicle operation. In addition, the ability to provide live video of fireground operations to the Incident Commander will not be possible.

### **PURPOSE / DESCRIPTION OF REQUEST**

Request is to establish two (2) Fire Training Instructor positions in order to provide a more consistent training across all divisions and shifts. The position is key to supporting the Battalion Chief of training on accomplishing the department's vision of "Service Through Excellence" as it relates to training. Additionally, the position will provide much needed assistance and/or guidance for creating curriculum, consistence presentation of training and expansion of our technical rescue/special operation programs to meet the needs of our growing city and need for specialized service. We currently utilize on shift personnel to help fill these needed positions when the shift staffing allows. There have been many times in the past when training was cancelled due to shift staffing. Last year the Training Division used a minimum of two on shift instructors for (31) weeks and at least four on shift instructors for (12) weeks. These two positions would be utilized all 52 weeks of the year and would allow for a much improved training program and improved service provided to both internal and external customers.

This is salary grade G, amount above reflects min.

ALL ONE TIME COSTS COULD BE CHARGED TO FACILITIES

#### SERVICE IMPLICATION

This position is tasked with several significant roles. The department recognizes that two full-time instructor positions are needed in order to make necessary improvements to keep up with the needs of our growing city. This position will reduce workload on current training personnel as well as the use of shift personnel as instructors. It will also improve the safety of personnel during training exercises and provide a more consistent message. All of these tasks happen on an ongoing basis. With the increase in call volume, personnel, response area, equipment, stations, responsibilities, training initiatives, etc., the ability for the current training staff to manage a training program of this size would create a considerable strain on the individuals and on our quality of training as a whole.

PURE	POSE / DESCRIPTION O	OF REQUEST		
PURPOSE / DESCRIPTION OF REQUEST  This request is to purchase a Highway Vehicle Stabilization Kit that will allow us to safely stabilize heavy highway loads. Our current comparable equipment only allows us to stabilize up to 10,000 lbs. which is designed for passenger car wrecks and lighter loads. This equipment will allow us to stabilize loads us to 80,000 lbs. with a 4:1 safety factor and would be used to safely stabilize tractor trailers, dump trucks, concrete trucks, heavy equipment and the like. Beyond heavy highway loads these struts have valuable application in temporary structure stabilization.				

# SERVICE IMPLICATION

Failure to fund this request will require us to operate on incidents involving unstable loads of greater than 10,000 lbs. without the means to safely and efficiently stabilize them. Our personnel will be subject to increased risks while operating at these incidents and our liability will increase.

## **PURPOSE / DESCRIPTION OF REQUEST**

The pupose of this request is to aid in the overall safety and wellness of our firefighters. Currently the city maintains 3 washer/ extractors for turnouts in the city. One of those being the newest NFPA compliant model. One of the biggest threats to the health and wellness of our firefighters is the carcinogens left behind after fires on their turnouts. These industrial washers and dryers are designed in conjucntion with turnout manufacturers to clean the gear of these toxins while still protecting the integrity of the gear for firefighting.

The expansion of this program will allow firefighters more access to wash their gear and to remove the toxins. It will give the fire department the ability to wash more gear at one time, currently you can wash up to two sets at a time, thus cutting down the need for a second set of gear for firefighters. The expansion of this program along with the plymovent systems as well as the peer fitness program is designed to keep our firefighters healthier and keeping medical and insurance cost down.

### **SERVICE IMPLICATION**

Faliure to fund this program is causing longer turnaround times to get firefighter turnouts washed and returned to service. This causes personnel to have to wear backup or reserve sets of gear. Along with the chance that firefighters may go without washing their gear due to the availability of the washer.

	PURPOS	E / DESCRIPTION O	F REQUEST	
This request is to outfit the department with a training cache of rope rescue equipment that can be utilized without the wear and tear on the equipment used for life safety. Currently, we use the same equipment for training that is used in actual emergencies. This causes, due to the training requirements and number of personnel, a lot of unneeded use on equipment.  By funding this request we will purchase basic equipment for the training center and use it during the training cycle through the year of recertfying our personnel. This will also keep fire units inservice without having to report to the training center and standby				
for rope training.				
		SERVICE IMPLICATI	ON	
	es unfunded we will continue to re training without the ability to rep		ment for training. Thus r	unning the risk of damaging
