I am concerned that the River access will be too near ~~the~~ the homes on Daniels drive. Sound travels on water and people fishing and boating may have the tendency to be loud. Also will all the river over looks still allow for residents to have privacy in their yards. Will new construction in the developable areas prevent the flood waters from being absorbed creating more flooding on the opposite banks?

I'm very excited. This is something that Franklin needs to be able to take full advantage of the river beauty.

Please contact me regarding any future Mtg or hearing regarding Franklin Land use plan(s). The design for the Riverwalk is terrible and does not take into consideration the property owner.

Love that city is planning the use of walkways & greenways. Love the Riverwalk CONCEPT. Please work with property owners to make a reality.

Your flood plane line on the north side of the river is in correct.

In less fifty one years the river has never gotten this high!!!

What is the cost for this?

The City needs to take care of what is needed, before what is ~~also~~ wanted.
