Sec. 25-403. Definitions.

- (1) *BOMA* means the City of Franklin Board of Mayor and Aldermen.
- (2) *Community Park* means a park that is larger in size and serves a broader purpose than Neighborhood Parks. Their focus is on meeting the recreational needs of several neighborhoods or large sections of the community, as well as preserving unique landscapes and open spaces. They allow for group activities and offer other recreational opportunities not feasible, nor desirable, at the neighborhood level. As with Neighborhood Parks, they should be developed for both active and passive recreation activities. The optimal size for a Community Park should exceed twenty-five (25) acres. Design features might include large play structures, informal fields for youth play, tennis courts, volleyball courts, horseshoe areas, swimming pools, disc golf, trails, group picnic areas, open space and unique landscapes/features, nature study areas, ornamental gardens, and facilities for cultural activities such as plays and concerts in the park.
- (3) *Comprehensive Parks and Recreation Master Plan* means the adopted long-range master plan for park and recreational facilities for the City of Franklin. The Plan establishes the City's vision and framework to guide park related facilities and amenities decisions, and includes planning policies and recommendations for the future development of the municipal park and recreation system for the City of Franklin.
- (4) *Developer* means any individual, firm, co-partnership, joint venture, association, corporation, estate, trust, business trust, receiver, syndicate, or other group, combination or entity responsible for a new Development or a new Development project.

- (8) *Floodplain* means the relatively flat or lowland area adjoining a river, stream, watercourse, lake, or other body of standing water, which has been or may be covered temporarily by floodwater. For purposes of this Title, the Floodplain is defined as the 100-year Floodplain having a one-percent chance of being equaled or exceeded in any given year, and/or any land area susceptible to being inundated by water from any source.

Greenways are usually kept in their natural state except for the pathway and areas immediately adjacent to the pathway.
- (10) *Neighborhood Park* means a park that is a basic unit of the park system and serves as the recreational and social focus of a neighborhood, with both passive and active activities. They are not intended to be used for programmed activities that result in overuse, noise, parking problems,

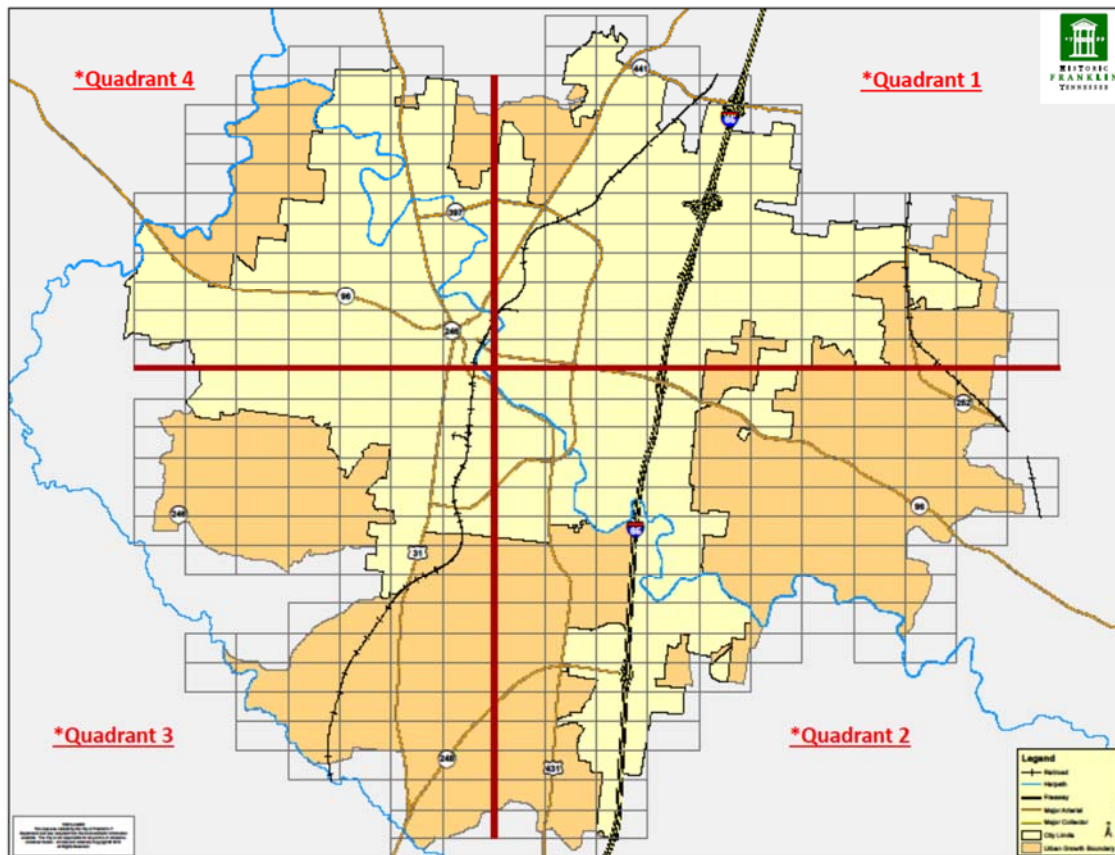

and congestion. They should be geared for those living within the service area. A Neighborhood Park accommodates a variety of ages, including children, adults, and seniors. Neighborhood Parks are usually not smaller than five (5) acres in size and are developed centrally within the neighborhood to encompass a service radius of half (½) mile. Neighborhood Parks primarily facilitate recreational activities, including play structures, sitting areas, and open space. Ideally, these Neighborhood Parks are linked to the neighborhood and to each other by a pathway or walk system and respond to the need for basic recreational amenities close to home.

PARK QUADRANT MAP

PARK DEVELOPMENT COST

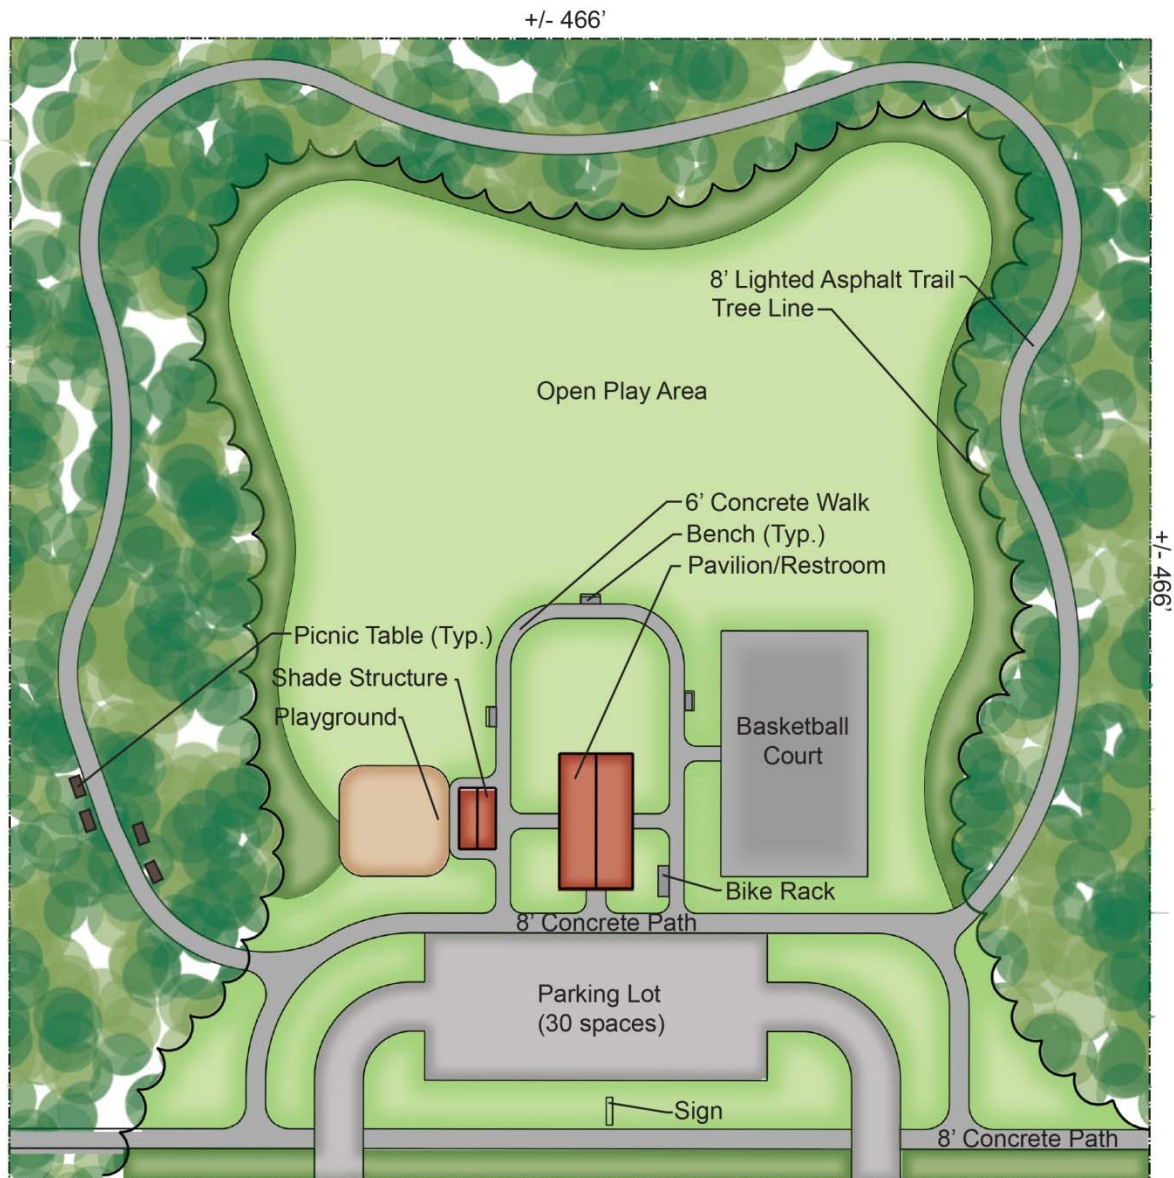

This appendix contains the basis for the park development costs used in the calculations in Appendix 1. The park development costs are based on a typical five (5) acre Neighborhood Park with basic amenities such as parking, a shelter, restroom, playground, a basketball court, lighting, open play space and site furnishings. The estimated costs include site preparation, utilities and storm drainage.

A generic site plan (without reference to a particular site) was developed to base an Opinion of Probable Cost. The generic site plan can be found on the following page.

The Opinion of Probable Cost was developed based on the following key assumptions:

- The site would be reasonably level by Franklin standards such that extensive earthwork would not be necessary and that no rock would be encountered in the excavation.
- Half the site (2.5 acres) would be cleared; it is assumed the site would not have mature trees
- A cut of 3 feet would be needed on ½ the site and a fill of 3 feet would be needed on the other ½ such that earthwork would balance.
- Water and sewer service would be available at the street in front of the park.
- Entry drives and parking area would be curbed; parking lot paved with asphalt.
- Landscape and lawn irrigation would be provided for the site.
- Where possible, quantities were taken off to include in the opinion of cost; when not possible allowances are provided.

The Opinion of Probable cost was developed using historical data for park construction by a design firm with extensive park design experience. The Opinion of Probable Cost can be found on the page following the site plan.
