She also stated that there many people who spoke about the worthiness of The Refuge Center. She stated she has concerns about the location and the road where there are blind spots and steepness. She also mentioned concern about the proximity to the new school. She stated this did not seem to be an appropriate location for the center.

REZONINGS AND DEVELOPMENT PLANS

Ms. Amy Diaz-Barriga, Current Planning Supervisor, stated that the requested zoning for this parcel is General Office (GO). A separate Resolution 2019-29 accompanies this zoning request for the corresponding Development Plan.

Staff looks to Envision Franklin for guidance. Envision Franklin places this area into two separate design concepts. The developable portions of the site are in Regional Commerce.

"The Regional Commerce design concept contains high-intensity activity centers that attract large numbers of people and employers from both within and outside the City. These areas include major employment and revenue generators that are valuable community resources.

Regional Commerce should transition in intensity and scale across this design concept. Higher-intensity uses should be located closer to the I-65 interchanges and major thoroughfares, with less-intensive uses transitioning to established residential areas."

The Regional Commerce Design Concept was applied to this area based on the City of Franklin's Capital Improvement Plan for roadway improvements. As part(s) of a future TIP project, Carothers Parkway and Peytonsville Road will be extended and Long Lane improved with a flyover over I-65. These future roadway improvements would be supportive of more intensive uses with appropriate transitions to the existing neighborhoods and residences in this area.

The other design concept for this property is Conservation. A portion of this site contains a protected hillside with slopes exceeding 14%. This area was designated on previous planning efforts conducted by the City of Franklin as worthy of preservation as part of the Hillside Protection Overlay (HHO).

Staff feels that zoning this property General Office (GO) with Hillside Overlay meets the goals of Envision Franklin to protect the hillside and provide a transition to existing neighborhoods. The associated Development Plan will also highlight these transitions.

Staff recommended a favorable recommendation to the Board of Mayor and Aldermen for the rezoning.

Chair Hathaway asked if there were any citizen comments. The following citizens spoke concerning Item 30.

1. *Joey Blakely - Opposed. Stated that there is a private covenant for the land. He stated that this is a residential area in the County.*
2. *Dwaine Allison - Opposed. Stated should preserve residential zoning for those who live there.*

The Applicant was represented by Greg Gamble, Gamble Design. Mr. Gamble stated they spent a lot of time discussing with the Planning Department staff what zoning would be appropriate. He stated that the General Office zoning has the greatest number of restraints and the fewest number of uses. For more control, the PUD zoning will limit the height to two stories and will establish greater setbacks. There will be tree preservation buffers and additional landscape buffers. They had a traffic study conducted. To address community concerns, The Refuge Center will be providing a turn lane. Also, Mr. Gamble stated that at this facility there will be no overnight stays or pharmaceutical sales. Mr. Gamble asked for the support of the Commission.

Chair Hathaway asked for a motion.

Commissioner Harrison moved, seconded by Commissioner Orr, that Ordinance 2019-09 be recommended to the Board of Mayor and Aldermen for approval.

Ms. Amy Diaz-Barriga, Current Planning Supervisor, stated that Envision Franklin identifies two design concepts for the site. The key goals for this property are to transition in intensity and to protect the natural features.

The Development plan will regulate the building form, placement on site, and overall access to the site. The development plan and General Office zoning complies with Envision Franklin by:

- 1. Providing the least intensive commercial zoning on this site;*
- 2. Providing an office building with Residential Design features and scale;*
- 3. Clustering all development on the portions of the lot under the Regional Commerce design concept;*
- 4. Preserving the portion of the lot covered by the Conservation Design Concept; and*
- 5. Providing an additional landscape screen and compatible setbacks along Long Lane to mitigate the transition of uses from Single Family Residential to an office use on this site.*

Staff recommended a favorable recommendation to the Board of Mayor and Aldermen, with conditions.

Chair Hathaway asked if there were any citizen comments. The following citizens spoke:

- 1. Joey Blakely - Opposed. Stated he believed this was a miscalculation in Envision Franklin and needed to be re-evaluated.*

He stated that they will provide dark sky lighting in the parking light which only illuminates the ground. Also, along Long Lane, they will provide a landscape evergreen buffer along the parking lot. Also, Mr. Gamble discussed the distance of the proposed building to the neighbors. He stated they had designed the Master Plan in concert with and compatibility to the residential form to the neighbors across the street. The Applicant stated he was there to answer any questions.

Mr. Christopher Andrews, Principal Planner, stated that the applicant is requesting a rezoning of 14.88 acres from Specific Development - Variety (SD-X) District to Specific Development - Variety (SD-X 2.02 / 95,618) District. The subject property is the Silver Grace PUD Subdivision, approved in 2009. The zoning is being updated to accurately reflect the assisted living facility as an institutional use rather than a residential use, an addition of assisted living space, and to establish a residential density. The total residential unit count remains the same, in that three single family lots are being re-assigned as cottage units.

The proposed additional square footage for the expansion of the assisted living facility is internal to the site and is supported as a use within Envision Franklin's Multifamily Residential design concept.

[SURVEY - 16-097\(11-30-16\)](#)

Mr. Christopher Andrews, Principal Planner, stated that the applicant is requesting a revised development plan for the Silver Grace PUD Subdivision (Fountains of Franklin), 14.88 acres. The existing development plan was approved in 2009. The applicant is also requesting that the zoning of the property is being updated to accurately reflect the assisted living facility as an institutional use rather than a residential use, an addition of memory care square footage, and to establish a residential density.

The total residential unit count included in the revision remains the same, however, three single family lots that front Chester Stevens Court are being re-assigned as cottage units. The applicant is also proposing a memory care expansion to the main living facility. This expansion is internal to the site and is supported as a use within Envision Franklin's Multifamily Residential design concept.

Staff recommended a favorable recommendation to the Board of Mayor and Aldermen.

Ms. Amy Diaz-Barriga, Current Planning Supervisor, stated that this property is located at the northwest corner of the intersection of Downs Blvd and Columbia Ave. The current zoning for these parcels is General Commercial (GC), Light Industrial (LI), and Neighborhood Commercial (NC). The requested zoning for these parcels is to combine all of those into General Commercial (GC).

GC and its associated uses are supported by the Design Concept for this area, which is Neighborhood Mixed Use.

[420 Bridge Street Survey](#)

Mr. Joseph Bryan, Planner, stated that the applicant is requesting to rezone the property at 420 Bridge Street from Civic Institutional (CI) to General Commercial (GC). The Fifth Avenue North Design Concept, as outlined in the Envision Franklin Land Use Plan, supports the proposed zoning as GC would allow for local commercial uses, professional and transitional offices to "extend the vibrant downtown core" to this established corridor. The adjacent property on the corner of Bridge Street and 5th Avenue North is already zoned GC. No corresponding site plan or development plan for the property has been submitted at this time.

As a project consideration, the applicant needs to submit a plan with the assistance of a design professional to change the existing occupancy type to the intended use. There may be work to bring the building into compliance for existing or new uses.

Staff recommended a favorable recommendation to the Board of Mayor and Aldermen.

Ms. Amy Diaz-Barriga, Current Planning Supervisor, stated that this property is currently two tracts totaling 27.19 acres. The Specific Development Variety (SD-X 21.8/1,375,000/700) parcel is 22.04. The smaller 5.15 acre parcel is intended to be used as part of the PUD development plan requirement for parkland dedication and tree canopy preservation and zoned Civic-Institutional (CI).

For the portion of the development zoned SD-X, Envision Franklin recommends a Regional Commerce design concept.

The proposed mix of uses (Attached Residential, Office, and Hotel) as outlined in the Aureum PUD Development Plan (Resolution 2019-31) meet the intent of the Regional Commerce Design Concept by providing activated streetscapes and comprehensive site planning.

Ms. Amy Diaz-Barriga, Current Planning Supervisor, stated that Envision Franklin recommends a Regional Commerce Design Concept for this parcel. The intent of the Regional Commerce design concept is to contain high-intensity activity centers that attract large numbers of people and employers from both within and outside the City. These areas include major employment and revenue generators that are valuable community resources.

The intended building layout maximizes the building frontage on the internal road in a manner like what was designed for Ovation PUD Subdivision immediately to the east (across Carothers Parkway) and Apex Village PUD Subdivision to the northeast of this site. The uses, which include attached residential, office, and hotel, help to further an integrated mixed-use node from I-65 to Carothers along East McEwen Drive. The design intent of this development complements the existing and planned built environment for this area.

This development plan is intended to transition in building height, massing, and intensity of uses from the north (East McEwen Drive) to the South (Hillside Overlay-HHO) and from East (Carothers Parkway) to West (Tower Circle). The development uses a series of shielded parking, pedestrian plazas/open spaces, and building heights to emphasize the changes in grade of this site.

A total of 480 attached residential dwelling units are proposed with this development. These units are dispersed into 4 separate buildings, clustered at the southwest quadrant of the site (Tower Circle/Ovation Parkway/Edward Curd Lane). The intent of Envision Franklin is met with the conceptual massing elevations and overall site layout as presented with the Development Plan. Massing elevations are included with the development plan. Exact building elevations will be approved at the site plan level but are expected to meet this section of Envision Franklin.

MOS 1 is for Roof Form. The City of Franklin Zoning Ordinance 5.3.5(e)(i) specifies: Attached residential structures shall incorporate roof pitches between 3:12 and 12:12. The applicant has requested all residential structures have flat roofs to achieve an urban form consistent with the building heights proposed in this development (up to 12 stories).

Staff finds flat roofs are appropriate in the context of this development and adjacent developments.

Staff Recommended Approval of Modification of Standards #1.

MOS 2 is for Retaining Wall Materials. The Applicant has requested that MOS 2 be withdrawn. She stated that there would not be a vote on MOS 2.

Mr. Jimmy Wiseman, Assistant Director of Engineering, stated that Section 2.1.3(2)(g) of the Transportation and Technical Street Standards, and Section 5.10.3(5)(d)(ii) of the Zoning Ordinance both require that lanes used for turning movements within intersections shall maintain a minimum Level of Service D. With the continued development and redevelopment of the Cool Springs area and an above average growth factor, we will see impacts on our traffic network. The already approved background traffic and proposed added density on this property will result in a failed level of service of the McEwen Drive and I-65 Interchange and the McEwen Drive and Carothers Parkway intersection during the AM and PM peak hour. These intersections were modeled to include the future build-out of the integrated growth plan improvements and still result in a failed level of service.

The developer is still required to make substantial improvements to the network that will aid in reducing future delay. These improvements are highlighted in their development plan submittal. Additionally, the Engineering Staff will be bringing forth a proposal to the Board of Mayor and Aldermen for a detailed traffic modeling study for the Cool Springs area. The goal of the study is to provide an updated outlook of the traffic in the area as well as solutions for traffic operations and safety.

Staff recommended a favorable recommendation to the Board of Mayor and Aldermen, with conditions.
