Description	Total Cost \$6,500,000
New fire station located on Murfreesboro Rd east of the existing City limits.	
Justification	
Future annexation toward the east of our City limits will require an additional fire station. Areas immediately adjacent to the existing city limits are suitable for annexation to occur at any time and the City has multiple annexation requests for this area.

Description	Total Cost \$5,762,500
Add to station 3, replace with a new station, relocate the station or add an additional station to the current area.	
Justification	
The station currently located at 298 Mallory Station Road is not built to meet the need nor is best situated to respond to the area it protects. There are several options available to meet our needs and the greatest costs option is presented here. Additional study will be needed to finalize the best direction to proceed.

Category Emergency Services
Priority 1 Star Project
Status Pending

Description	Total Cost \$3,750,000
To develop the vacant lot located between Beasley Drive and the Fire Driving Pad for a new 2-story Fire Training Center.	
Justification	
As the City grows, this facility will be needed to provide sufficient space to conduct routine training to our personnel, police personnel, etc and will incorporate community rooms as well.

Project #	FD19007
Project Name	Outdoor Warning Sirens

Department Fire
Contact Fire Chief
Type New
Useful Life 20+
Category Emergency Services
Priority 2 Star Project
Status Pending

Description	Total Cost \$70,000
New Outdoor Warning Sirens for the new annexed areas will serve to provide advanced warning when possible of impending tornados.	
Justification	
This will provide an additional safety warning for the residents of the community and the east side (FY20) and the southwest side (FY24) as annexation occurs.

Category	Parks and Recreation
Priority	4 Star Project
Status	Pending

Description	Total Cost \$482,870
Restoration started on the exterior of the home in 2012 through receiving grants and utilizing funding from the Hotel/Motel fund for the stabilization of the foundation and specific features which included the porches, foundation, chimney, and gutter systems. In FY19, the Parks Department has budgeted for a master plan update for architectural services to include the Hayes Home. The master plan will identify the history/current use; proposed programming/use and existing conditions which will result in concept drawings (conceptual site, floor and elevation plans) for the interior and exterior of the home. The consultant will provide a conceptual opinion of probable cost for the total restoration project. Further budget costs will be updated in fall 2018.	
Justification	
Historical Structure listed on the National Register of Historical Places. The updated master plan will include Hayes Home, Main Barn, former Power House, Worker Houses, pedestrian trail and bridge connection to the interurban.

Description

Total Cost \$1,719,070

In 2005, a master plan was completed by Archimania, but was more of an overview of the site. The objective of the updated master plan is to evaluate specific structures and develop concepts that broaden their usefulness. In FY19, the Parks Department has budgeted for a master plan update for architectural services to include the Main Barn. The master plan will identify the history/current use; proposed programming/use, HVAC/Sprinkler (dry system) and existing conditions which will result in concept drawings. The consultant will provide a conceptual opinion of probable cost for the total restoration project. Further budget costs will be updated in fall 2018.

Justification

Historical Structure listed on the National Register of Historical Places. The updated master plan will include Hayes Home, Main Barn, former Power House, Worker Houses, pedestrian trail and bridge connection to the interurban.

Description	Total Cost \$575,000
According to the master plan, a specific use for this facility was not decided. Once funding is available for restoration, a community plan should be incorporated into the scope for final design. The barn was used for equestrian functions when privately owned. The concept is to continue equestrian use and rentable space with an outdoor patio for public/private events.	
Justification	
All structures at the Park at Harlinsdale Farm are listed on the National Register of Historical Places.

In 2005, a master plan was completed by Archimania, but was more of an overview of the site. The objective of the updated master plan is to evaluate specific structures and develop concepts that broaden their usefulness. In FY19, the Parks Department has budgeted for a master plan update for architectural services to include the two Worker Houses on the main drive at Harlinsdale. The master plan will identify the history/current use; proposed programming/use, HVAC and existing conditions which will result in concept drawings. The consultant will provide a conceptual opinion of probable cost for the total restoration project. Further budget costs will be updated in fall 2018.	
Justification	
All structures at the Park at Harlinsdale Farm are listed on the National Register of Historical Places. Public-Private partnerships should be utilized in the design, restoration and programming of the two sites.	

Expenditures	FY 19	FY 20	FY 21	FY 22	FY 23	FY 24	FY 25	FY 26	FY 27	FY 28	Total

Project #	PK16007
Project Name	North Pavilion & Restroom Facility (Harlinsdale)

Department	Parks
Contact	Park Director
Type	Improvement
Useful Life	20+
Category	Parks and Recreation
Priority	1 Star Project
Status	Pending

Description	Total Cost \$346,000
Once known as the "hay barn" on the north side of the property, repurposing the original structure into an open air pavilion and restroom facility. Adjacent to existing parking areas, the open air pavilion would include picnic tables, water and electricity with a family restroom added to one end to serve the general public, dog park participants and pavilion rentals. The barn is approximately 32' width x 48' in length.	
Justification	
All structures at the Park at Harlinsdale Farm are listed on the National Register of Historical Places. Utilizing the footprint of the "hay barn" fills a request for small parties to take place on the property. The pavilion would be rented and provide additional revenue for the site.

Description

Total Cost \$5,400,000

Liberty Park Improvements: The first phase of Liberty Park was completed in 2003 with the second phase completed in 2008. The proposed project would complete the park by adding two parking areas, tennis courts or pickle ball, basketball courts, a lighted multipurpose field, mountain biking trails and a restroom/pavilion combination facility.

Located in Parkland Dedication Quadrant 1.

Justification

All improvements are identified in the Liberty Parks Master Plan; the Community project is located in Quadrant 1 within the Parkland Impact Fee Ordinance.

PK16009—Liberty Park Improvements IV

Project #	PK16011
Project Name	Greenway (Aspen Grove to Mack Hatcher)

Department	Parks
Contact	Park Director
Type	New
Useful Life	20+
Category	Parks and Recreation
Priority	4 Star Project
Status	Pending

Description

Total Cost \$1,555,000

Aspen Grove Trail Connection is identified in the Parks Master Plan as 1/2-mile trail~greenway connection that will link pedestrians from the Cool Springs area to the Mack Hatcher trailhead and multipurpose pathway located on Mack Hatcher Parkway. The existing multipurpose pathway is connected to Harlinsdale Farm and ultimately to the historic downtown. Land acquisition and construction will be part of constructing the missing link.

Located in Parkland Dedication Quadrant 1.

Justification

The Aspen Grove Trail Connection project is located in Quadrant 1 within the Parkland Impact Fee Ordinance. The trail~greenway connection is identified in the Parks Master Plan.

Description	Total Cost \$1,997,800
<p>From existing sidewalks on 1st Ave., the trail would head north parallel to the Harpeth River to join the existing trail system at Bicentennial Park. Acquisition of ROW would be needed for two private landowners. The City did an environmental assessment of the former dump site in 2016.</p> <p>Located in Parkland Dedication Quadrant 4.</p>	
Justification	<p>Provides a missing connection along the south side of the river. Additional improvements along 1st Ave will be made as part of the Harpeth Square Development project. The trail connection project is located in Quadrant 4 within the Parkland Impact Fee Ordinance. The trail-greenway connection is identified in the Parks Master Plan.</p>

Description
In 2015, the City entered into a Professional Service Agreement with Edge Planning Landscape Architecture & Urban Design to provide design services for the approximately 80 acre Lockwood Glen Park. Edge will be providing a final master plan for the park as the City of Franklin and Crescent Communities assume responsibility in for the total cost of the master plan. The goal is to develop a working plan that can be considered a passive public park in the near future. Located adjacent to the Carothers's South Parkway. Part of the plan will include programming the 12-acre lake, public parking areas, public restrooms and walking trails around the Harpeth and the property. Located in Parkland Dedication Quadrant 2.

Project #	PK16019
Project Name	Harlinsdale Farm Interurban Trail Connection

Department Parks
Contact Park Director
Type Improvement
Useful Life 20+
Category Parks and Recreation
Priority 1 Star Project
Status Pending

Description	Total Cost \$1,960,000
The area once housed the interurban rail system from Nashville to Franklin. Will allow for pedestrian & vehicular (pre & post special events) movement through the site for ADA parking/access from the fishing pond to the canoe launch. The road/ped connection would serve as part of the interconnectivity within the park and will be limited to (12') twelve wide only with an ADA trail leading to the existing fishing pier. The existing bridge was used to cross the creek which split the north and south side of the property near the pond. Recommendation to replace the bridge with a pedestrian bridge 12' wide.	
Justification	
A possible Public-Private partnerships should be utilized in the design and construction of these amenities.

Project #	PK19005
Project Name	Greenway (Aspen Grove to Mallory Station Rd)

Department Parks
Contact Park Director
Type Improvement
Useful Life 20+
Category Parks and Recreation
Priority 2 Star Project
Status Pending

Description	Total Cost \$2,400,000
Aspen Grove Trail Connection is identified in the Parks Master Plan as 1/2-mile trail~greenway connection that will link pedestrians from the Cool Springs area to the Mack Hatcher trailhead and multipurpose pathway located on Mack Hatcher Parkway. Moving in the opposite direction, Spencer Creek flows toward Mallory Station Road with a length of .97 miles. Connecting commercial users and resident to the Cool Springs Mall area north of Aspen Grove Park provides a safe pedestrian connection in this area. Located in Parkland Dedication Quadrant 1.	
Justification	
The Aspen Grove Trail Connection project is located in Quadrant 1 within the Parkland Impact Fee Ordinance. The trail~greenway connection is identified in the Greenway and Open Space Master Plan.

Project Name	Greenway (Harlinsdale Manor to Harlinsdale Farm)

Department Parks
Contact Park Director
Type Improvement
Useful Life 20+
Category Parks and Recreation
Priority 2 Star Project
Status Pending

Description	Total Cost \$730,000
Perform the final connection from the north end bridge (Daniel McMahon Road) to the existing equestrian trails at Harlinsdale. The current area has a paved walking trail from Harlinsdale Manor. The area once housed the interurban rail system from Nashville to Franklin. A pedestrian bridge was built in 2015 with only a gravel trail leading to the Harlinsdale Manor subdivision from Daniel McMahon Road which connects to the Mack Hatcher Parkway multipurpose trail. The connection provides for a 12' wide asphalt pedestrian trail to accommodate every trail uses and for access during large events when the neighboring church parking area is utilized without pedestrians walking on Franklin Road. Located in Parkland Dedication Quadrant 1.	
Justification	
A possible Public-Private partnerships should be utilized in the design and construction of these amenities.

Project #	PK19007
Project Name	Greenway (Pinkerton Park to Franklin Road Bridge)

Department Parks
Contact Park Director
Type Improvement
Useful Life 20+
Category Parks and Recreation
Priority 2 Star Project
Status Pending

Description

Total Cost \$5,272,745

From the existing trail inside Pinkerton Park, the greenway would head north and west along the banks of the Harpeth, this time hugging a small shelf below Fort Granger as the trail approaches Downtown Franklin and would connect under the Franklin Road Bridge leading to the new sidewalk toward the Park at Harlinsdale Farm or south into downtown Franklin.

Located in Parkland Dedication Quadrant 1 and 4.

Justification

Provides a missing connection along the north side of the river. The trail connection project is located in Quadrant 1 & 4 within the Parkland Impact Fee Ordinance. The trail~greenway connection is identified in the Parks Master Plan.

Project #	PK19009
Project Name	Harlinsdale Farm Pond Renovation

Department	Parks
Contact	Park Director
Type	Maintenance
Useful Life	20+
Category	Parks and Recreation
Priority	2 Star Project
Status	Pending

Description	Total Cost \$765,000
According to the 2005 master plan for Harlinsdale Farm, a pond was constructed to accommodate additional stormwater from Franklin Road and the overall property. Effluent water was installed to accommodate a specific water level in the pond so the amenity could be used for recreational fishing. The pond since it's opening in 2008-09 has been stocked with fish for a catch and release program. Currently, the pond is leaking and a new liner is suggested to keep the public recreation amenity.	
Justification	
Without repairing the pond, the city must continue to run effluent water into the area which is an increased demand on the overall effluent system.

Project Name	Thompson Alley Neighborhood Park

Department Parks
Contact Park Director
Type Improvement
Useful Life 20+
Category Parks and Recreation
Priority 3 Star Project
Status Pending

Description	Total Cost \$222,000
<p>Obtained post-flood 2010, the Parks Department maintains the vacant land on a weekly mowing basis. The Parks Master Plan identified the need in the study to identify and construct more neighborhood parks. Due to being a FEMA property, the Parks Department identified the existing seven FEMA properties as potential neighborhood parks. Neighborhood meetings took place in 2016-17 with Thomas Alley residents and received feedback from regarding use for the small parcel. The submitted design completed by Park staff provided feedback to residents through the process. Due to location, a formal design will need to be completed to consider any issues with design, materials for flood elevations.</p> <p>Located in Parkland Dedication Quadrant 3.</p>	

Justification
This neighborhood park project is located in Quadrant 3 within the Parkland Impact Fee Ordinance. The deficit of neighborhood parks were identified in the Greenway and Open Space Master Plan.

Project Name	Harlinsdale Irrigation & Landscaping Project

Department	Parks
Contact	Park Director
Type	Improvement
Useful Life	10-20 years
Category	Parks and Recreation
Priority	1 Star Project
Status	Pending

Description

Total Cost \$283,270

In FY18, the Parks Department obtained an full irrigation design plan for the arena area, the Main Barn and adjacent event lawn along with the former Power House and surrounding open space. The proposed project would be completed in three phases. The first phase would address drainage issues and irrigation installation. The second phase would see a continuation and completion of the irrigation installation and the beginning of landscape installation around the Scores Stand, South Paddock, and turf improvements. The third phase would include landscape improvements around the Concession Stand/Bathroom, the North Paddock, and turf in those areas. This project will also see improvement in ADA accessibilty to the site by the addition of paved walkways leading to a paved observation area on the terraced berm.

Justification

Friends of Franklin Parks raised the funding for the arena site with the City partnering to construct the concession/restroom structure. Landscaping was eliminated due the expenses along with irrigation in the turf areas. Presently, in order to assist the maintenance of the area, the Parks Department is recommending installing the three phases fo the project as the arena has become very much a focal point within the parks system. Continuing with no irrigation, existing turf continues to die and left with a dusty environment not condusive for the increased use.

Description	Total Cost \$3,810,000
<p>Future development is anticipated on the east side of the Goose Creek Interchange. When this area develops, the gravity sewer from the Ladd Park interceptor will need to be extended down to Bishop Branch. The extension is approximately 12,000 LF.</p> <p>Anticipate design to begin in FY 2025, ROW acquisition to begin in FY 2026, and construction to begin in FY 2027.</p>	
Justification	
<p>This area has great economic development potential. The Ladd Park Interceptor does not have the capacity to handle additional, dense development.</p>

Project Name	Old Carters Creek Pike Water Line Replacement

Department Water Management
Contact Water Management Director
Type Improvement
Useful Life 20+
Category Public Utilities
Priority 3 Star Project
Status Pending

Description	Total Cost \$559,498
Replacement of approximately 3,200 LF of 6-inch cast iron water line from West Main Street to terminus of Franklin's water system along Old Carter's Creek Pike. Phase 2 will consist of looping the line, however, Phase 2 will occur at later date based upon development in this area.	
Justification	
Line is over 60 years old. The project will improve water loss, water age, fire flow and water quality for this area.	

Prior	Expenditures	FY 19	FY 20	FY 21	FY 22	FY 23	FY 24	FY 25	FY 26	FY 27	FY 28	Total

Description	Total Cost \$1,320,000
Replacement of 2,875 LF of water line. Upgraded size to be determined during design.	
Replacement of 2,875 LF of existing 8" sanitary sewer line. Upgraded size to be determined during design.	
Anticipate both projects are entirely renewal versus capacity.	
Justification	
Lines are approximately 60 years old and have served their useful life. Area has been subject to pressure, disinfection residuals, and flow issues on water line. Sanitary sewer is subject to infiltration and inflow and occasional obstructions.

Description	Total Cost \$102,730
Rehabilitation of these two stations to include new pump bases and other appurtenances to reduce vibration and maintain efficiency. Bypass pumping will be required during maintenance and is included in this cost.	
Justification	
These two stations have structural/maintenance issues that are hindering the ability of the station to perform effectively. Bypass pumping will be required during maintenance and is included in this cost.

Project Name	Sewer Rehabilitation On-Call Services (manholes)

Department	Water Management
Contact	Water Management Director
Type	Improvement
Useful Life	20+
Category	Public Utilities
Priority	4 Star Project
Status	Active

Description	Total Cost \$200,000
Manholes that are indetified to be contributors of excessive amounts of inflow & infiltration, or corrosion from hydrogen sulfide gases due to due to turbulent conditions.	
Exact locations of manholes will be determined based upon identified need and in adjacent project status.	
Justification	
Lining of manholes will reduce excessive infiltration and inflow and reduce the amount of excessive flow on downstream structures.

Project Name	Claude Yates WRF Water Line Improvements

Department	Water Management
Contact	Water Management Director
Type	Improvement
Useful Life	20+
Category	Public Utilities
Priority	4 Star Project
Status	Active

Description	Total Cost \$600,000
Replacement and upsizing of the water line from Hillsboro Road, down Claude Yates Drive, to the Water Reclamation Facility. The line will be stubbed out for the WRF contractor to complete remaining improvements.	
Justification	
The new processes at the WRF require additional water capacity beyond what is available. Upgrade of this line to a 12-inch will provide adequate flows for the future capacity of the plant.

Description	Total Cost \$498,400
Stream and Bank Stabilization project on Ralston Creek at Liberty Hills Subdivision.	
Justification	
The City has received a number of complaints from residents in the Royal Oaks Subdivision regarding flooding due to storm water from Ralston Creek overtopping the stream banks. There are also certain areas along Ralston Creek that are experiencing bank failure, some of which the City has attempted to temporarily address until a permanent solution can be determined and installed. The property located 3009 Liberty Hills Drive has lost a significant portion of their back yard and is no experiencing structural cracks within their home.

Department	Stormwater
Contact	Engineering Director
Type	New
Useful Life	20+
Category	Stormwater
Priority	1 Star Project
Status	Pending

Description	Total Cost \$2,250,000
Install drainage infrastructure in the area of Parkview Drive.	
Justification	
The existing stormwater system mainly consists of a series of intermittent roadside ditches and culverts. This area has been a problem since the early 90's with no substantial improvements. The roadways lack drainage infrastructure. This infrastructure is needed to help protect against localized flooding during heavy rain events. The installation of stormwater infrastructure in the older areas of town should be completed when the Water and Sanitary sewer is rehabilitated.

Project Name	100 Block Battle Avenue Drainage Improvements

Department	Stormwater
Contact	Engineering Director
Type	Improvement
Useful Life	20+
Category	Stormwater
Priority	2 Star Project
Status	Funding Obligated

Description	Total Cost \$2,087,700
This project includes the construction of a regional detention pond located between 107 Battle Avenue and 101 Fairground Street. This project will include a design for a 100-year storm event and a new stomrwater pump station.	
Justification	
For years there have been properties in the Battle Avenue area that have experienced localized flooding. 5 properties reported damage during the May 2010 Flood. 3 of the properties had water in the crawl space to the floor framing and t properties had 1-3' of standing water in their finished basement. The impacted properties include 109, 111, 113, 114 and 117 Battle Ave.

Project #	SW16004
Project Name	Figuers Drive Area Drainage Improvements

Department	Stormwater
Contact	Engineering Director
Type	New
Useful Life	20+
Category	Stormwater
Priority	1 Star Project
Status	Pending

Description	Total Cost \$2,083,700
This project includes the installation and upgrade of existing stormwater infrastructure in the Figuers Drive Area to include: Channel improvements from Alicia Drive to Figuers Drive; Culver upgrades at Perkins Drive and Figuers Drive, Diversion Storm Sewer from Figuers Dr. to Perkins Dr, Concrete Channel from Perkins Dr. to Alicia Dr and 6x3 RCB at Alicia Dr.	
Justification	
The City has received a number of recent complaints from residents in the Figuers Drive area. Large rain events can cause flooding on the roadway and impact around 5 residential structures. Numerous other properties nad roadways are impacted by nuisance flooding problems associated with lack of infrastructure in the area.

Project #	SW16005
Project Name	Jordan Branch (Cool Springs E) Stream Restoration

Department Stormwater
Contact Engineering Director
Type Improvement
Useful Life 20+
Category Stormwater
Priority 4 Star Project
Status Funding Obligated

Description	Total Cost \$1,018,795
Restore and stabilize banks along Jordan Branch within The Meadow Subdivision located off of Bakers Bridge Avenue.	

Justification
The City of Franklin has had complaints for several years regarding erosion of Jordan Branch/Spencer Creek which flows behind several houses before flowing under Cliffe Run in The Meadow Subdivision located off of Bakers Bridge Avenue. Jordan Branch is severely entrenched with eroding and undercut banks. The trees are in danger of falling and could possibly fall on or very near the 18 homes bordering Jordan Branch. Relatively large portions of backyards are likely going to be "uprooted" when the trees fall. Stormwater channels designed to convey flow from the subdivision to the stream are "head-cutting" which is also contributing to the loss of backyards in the form of eroding channels between lots.

Description	Total Cost \$553,500
An existing channel between the Carlisle Subdivision and Founders Point Subdivision has created localized flooding within the Carlisle Subdivision. This project involves piping in the wet weather conveyance located between the Carlisle HOA and Founders Pointe HOA.	
Justification	
A study completed in 2018 shows that multiple properties are impacted by the 100 yr storm event. One of the properties located in the Carlisle HOA has been flooded at least 3 times since the Carlisle HOA was developed.

Description

Total Cost \$8,490,720

Carlisle Lane include improvements from Highway 96 West (SR-96) to the future Mack Hatcher improvements. The typical section will include two (2) lanes with turn lanes; bike lanes; sidewalks, curb/gutter and drainage improvements. Approximate project length of 4,830 LF

Project located in Collector Service Area 4

Justification

Development in this area of the city continues to increase. The roadway has horizontal and vertical alignment issues that need to be corrected to improve safety.

Project #	ST16003
Project Name	Goose Creek Bypass Extension

Department	Streets
Contact	Engineering Director
Type	New
Useful Life	20+
Category	Transportation
Priority	1 Star Project
Status	Pending

Description	Total Cost \$22,245,000
Extension of Goose Creek Bypass east of I-65 to Long Lane. The project shall be constructed as a four (4) lane, median divided facility with turn lanes as required. Project shall include: access management (as allowable), curb & gutter, ITS Infrastructure, and accomodations for pedestrians and bicycles. Approximate project length of 5,500 LF.	

Justification
<p>Congestion Mitigation: AADT on Carothers Parkway is expected to reach 25,000 VPD. The board has approved numerous developments in the South East section of the City. Approvals include approximately 2,663 Single Family Units, 2,004 Multi-Family Units, 1.8 Million SF in Retail and 3.4 Million SF in Office/Civic Development.</p> <p>Safety: As traffic increases on Carothers Parkway this roadway will become increasingly important. Long Lane is a collector roadway and will not be able to handle the project AADT that is anticipated on Carothers Parkway and Goose Creek Bypass Extension.</p> <p>Economic Development: Access to I-65 and Berry Farms potentially makes this the next high growth area within Franklin. It should be noted that future Economic Development opportunities along this roadway will be limited unless the City or a Developer start the extension of the Harpeth River Interceptor. The interceptor will need to be extended approximately 14,000 LF prior to development along this roadway.</p>

Priority	1 Star Project
Status	Pending

Description	Total Cost \$7,664,000
Extension of Carothers Parkway, from proposed Goose Creek Bypass (SR-248) Extension to its existing southern terminus at Long Lane. The project shall be constructed as a four (4) lane, median divided facility with turn lanes as required. Project shall include: access management (as allowable), curb & gutter, street lights, ITS Infrastructure, and accomodations for pedestrians and bicycles. Approximate project length of 1,650 LF.	
Justification	
Congestion Mitigation: AADT on Carothers Parkway is expected to reach 25,000 VPD. The board has approved numerous developments in the South East section of the City. Approvals include approximately 2,663 Single Family Units, 2,004 Multi-Family Units, 1.8 Million SF in Retail and 3.4 Million SF in Office/Civic Development.	
Safety: As traffic increases on Carothers Parkway this roadway will become increasingly important. Long Lane is a collector roadway and will not be able to handle the project AADT that is anticipated on Carothers Parkway and Goose Creek Bypass Extension.	
Economic Development: Access to I-65 and Berry Farms potentially makes this the next high growth area within Franklin. It should be noted that future Economic Development opportunities along this roadway will be limited unless the City or a Developer start the extension of the Harpeth River Interceptor. The interceptor will need to be extended approximately 14,000 LF prior to development along this roadway.

PEYTONSVILLE

Project #	ST16005
Project Name	Peytonsville Rd & Pratt Ln Int. Improvements

Department	Streets
Contact	Engineering Director
Type	Improvement
Useful Life	20+
Category	Transportation
Priority	2 Star Project
Status	Active

Description	Total Cost \$11,413,416
<p>Reconstruction of the intersection of Peytonsville Road and Pratt lane to a conventional T-intersection. The included section Old Peytonsville Road shall be reconstruction as a four (4) lane, median divided facility, while the included section of Pratt Lane shall be reconstructed as a two (2) lane facility. Both streets shall have turn lanes as required. Project shall include: access management (as allowable), curb & gutter, ITS Infrastructure, and accomodations for pedestrians and bicycles. Approximate project length of 2,300 LF.</p> <p>Project located in Collector Service Area 2.</p>	
Justification	
<p>Congestion Mitigation: Peytonsville Road provides access between SR840 and the Goose Creek Interchange. Traffic will increase in this area as development continues. In addition this roadway will see heavy traffic when accidents occur on SR-840 and I-65.</p> <p>Safety: Peytonsville Rd & Pratt Ln have geometric issues that need to be addressed as traffic increases in this area of the City. It was agreed upon by the Reams-Fleming Team and the City that Reams Fleming will not be allowed to have access to Pratt Lane until the City makes the necessary safety upgrades to this intersection.</p> <p>Economic Development: Lampo Group is currently proposing their cooperate headquarters in the southern section of Reams-Fleming PUD. This includes approximately 650,000SF of commercial office space. As Reams-Fleming develops the city will need to fund this improvement to reduce congestion and provide alternative routes so that we can retain businesses long term.</p>

ST16005 - PEYTONSVILLE RD & PRATT LN INT. IMPROVEMENTS

Project #	ST16006
Project Name	Jordan Road (Aspen Grove Dr-Mallory Ln)

Department Streets
Contact Engineering Director
Type Improvement
Useful Life 20+
Category Transportation
Priority 4 Star Project
Status Active

Description	Total Cost \$4,808,980
Improvement of Jordan Road, from Aspen Grove Road to Mallory Lane. Reconstruction of Jordan Road to City standard two (2) lane facility with turn lanes as required. Project shall include: curb & gutter, ITS Infrastructure, and accomodations for pedestrians and bicycles. Approximate project length of 1,700 LF. Project located in Collector Service Area 1.	
Justification	
Congestion Mitigation: As McEwen Town Center develops out this roadway will become extremely important to help reduce traffic on Mallory Ln, Cool Springs Blvd and Mallory Lane. The developer of McEwen Town Center was required to improve Jordan Road; however, those conditions were removed by the FMPC and BOMA. Safety: This rural roadway is located in a very urban area and has extremely narrow lanes and significant geometric issues that need to be corrected. Ideally this would happen as McEwen Town Center develops out its remaining property. Economic Development: Redevelopment and future economic development in the Cool Springs area continues to occur. Upgrades are needed to reduce congestion and improve safety so that we can retain and attract new businesses long term.

Project Name	East McEwen Drive Improvements - Phase 4

Department	Streets
Contact	Engineering Director
Type	Improvement
Useful Life	20+
Category	Transportation
Priority	5 Star Project
Status	Funding Obligated

Description	Total Cost \$35,755,463
Improvement of East McEwen Drive, from 800 feet east of the roundabout at Cool Springs Boulevard/Oxford Glen Drive to Wilson Pike (SR-252). The project shall be constructed as a four (4) lane, median divided facility with turn lanes as required. Project shall include: access management (as allowable), curb & gutter, street lights, ITS Infrastructure, and accomodations for pedestrians and bicycles. Approximate project length of 8,200 LF.	
Justification	
<p>Congestion Mitigation: The Cools Springs Area is a major employment area within middle TN. As development continues along Carothers Parkway so does the AADT on McEwen Drive. McEwen Drive is an important East / West Connector between Nolensville, La Vergne, Smyrna and Rutherford County. In the last few years the Board has approved 5.2 Million SF of Office, 450,000 SF of retail, 700 hotel rooms and 2,418 multifamily units at the Carothers and McEwen Intersection alone. Improving this roadway will help to significantly reduce congestion for commuters trying to access the Cool Springs area.</p> <p>Safety: This rural roadway is an important East / West Connector between Nolensville, La Vergne, Smyrna and Rutherford County. This roadway has significate vertical and horizontal issues that need corrected to improve safety.</p> <p>Economic Development: The City has invested heavily in the Carothers McEwen area over the last few years. We are now seeing the private market invest millions of dollars into office and retail space along Carothers Parkway. These upgrades are needed to reduce congestion and improve safety so that we can retain and attract new businesses long term.</p>

Project #	ST16008
Project Name	East McEwen Dr. Right-Turn Bypass Lane

Department Streets
Contact Engineering Director
Type Improvement
Useful Life 20+
Category Transportation
Priority 5 Star Project
Status Funding Obligated

Description	Total Cost \$2,186,155
Improvement of roudabout at East McEwen Drive and Cool Springs Boulevard/Oxford Glen Drive. The project consists of the construction of a riight-turn bypass lane for westbound motorists turning right from East McEwen Drive onto Cool Springs Boulevard. Approximate project length of 1,000 LF.	

Justification
<p>Congestion Mitigation: The Cools Springs Area is a major employment area within Middle TN. As development continues along Carothers Parkway so does the AADT on McEwen Drive. McEwen Drive is an important East / West Connector between Nolensville, La Vergne, Smyrna and Rutherford County. In the last few years the Board has approved 5.2 Million SF of Office, 450,000 SF of retail, 700 hotel rooms and 2,418 multifamily units at the Carothers and McEwen Intersection alone. Improving this intersection will help to significantly reduce congestion for commuters trying to access the Cool Springs area.</p> <p>Safety: This roundabout has one of the highest crash rates within the city. The high crash rate is probably due to lack of public understanding of how to drive through a roundabout and the high volume of traffic utilizing this roundabout. The addition of right-turn bypass lane is anticipated to reduce both congestion and accidents at this intersection.</p> <p>Economic Development: The City has invested heavily in the Carothers McEwen area over the last few years. We are now seeing the private market invest millions of dollars into office and retail space along Carothers Parkway. These upgrades are needed to reduce congestion and improve safety so that we can retain and attract new businesses long term.</p>

Project #	ST16009
Project Name	Franklin Road Improvements & Streetscape

Department	Streets
Contact	Engineering Director
Type	Improvement
Useful Life	20+
Category	Transportation
Priority	5 Star Project
Status	Funding Obligated

Description	Total Cost \$18,489,642
Improvement of Franklin Road, from the bridge at the Harpeth River to Hooper Lane. The project shall be constructed as a three (3) facility. Project shall include: curb & gutter, street lights, ITS Infrastructure, sidewalks, and typical streetscape elements. Approximate project length of 3,500 LF.	

Justification
Congestion Mitigation: This project will provide limited congestion mitigation as it relates to vehicular traffic.
Safety: Pedestrian safety and utility upgrades are on the primary reasons for moving this project forward. This project will provide a safe way for pedestrians to access Harlinsdale Farm, Jamison Station and the Factory. As more events are moved to Harlinsdale Farm the priority of this project continues to increase.
Economic Development: Downtown Franklin is a destination point that attracts numerous visitors and business to City. We need to continue investment within our historic downtown area to ensure that it remains a safe and walkable community to all residents and visitors

ST16009 - FRANKLIN ROAD IMPROVEMENTS & STREETSCAPE

Project #	ST16010
Project Name	Beta Dr. Extension

Department Streets
Contact Engineering Director
Type Improvement
Useful Life 20+
Category Transportation
Priority 1 Star Project
Status Pending

Description **Total Cost** \$4,955,000

Extension of Beta Drive from its current southern terminus at Alpha Drive to Southeast Parkway. The project shall be constructed as a two (2) lane facility with turn lanes as required. Project shall include: curb & gutter, sidewalks, and a bridge across Saw Mill Creek. Approximate project length of 1,200 LF.

Justification

Congestion Mitigation: Columbia Ave has historically been one of our most congested roadways within the City of Franklin. The widening of Columbia Ave will help with this congestion but additional connectivity is needed to provide long term relief and access to the numerous business located in this area of the city.

Safety: As traffic increases on Columbia Ave this roadway will become increasingly important. Beta Drive Extension will provide a safe alternative route for both pedestrians and vehicles within the area.

Economic Development: Significant redevelopment is anticipated along Columbia Ave as improvements are implemented. Additional connectivity is needed to reduce congestion so that we can retain and attract new businesses long term.

Project #	ST16011
Project Name	Mallory/N Royal Oaks & Liberty Intersection Imp.

Department Streets
Contact Engineering Director
Type Improvement
Useful Life 20+
Category Transportation
Priority 3 Star Project
Status Active

Description	Total Cost \$8,794,200
Intersection improvements to North Royal Oaks Boulevard, Liberty Pike and Mallory Lane. This intersection is projected to be at a failure level in the next 3-4 years based on the proposed development along Carothers Parkway. If this project is not completed, there will be significant delays at this key intersection.	
Justification	
<p>Congestion Mitigation: It is anticipated that this roadway will reach failure levels within the next 5 years. The increased traffic is a result of all the development along Carothers Parkway and other areas within Cool Springs.</p> <p>Safety: No existing safety concerns at this intersection. Pedestrian facilities should be incorporated to the intersection improvements to comply with the Cities master plan.</p> <p>Economic Development: Redevelopment and future economic development in the Cool Springs area continues. This improvement is needed to maintain our high quality of life by reducing congestion and improving safety along this Major Arterial Roadway.</p>

Description	Total Cost \$18,730,200
Extension of East McEwen Drive from Wilson Pike (SR-252) to the Franklin/Brentwood City Limits. This project shall be constructed as a two (2) lane facility with earthwork to support a future expansion to a four (4) lane, median divided facility. This project shall include: access management (as possible), curb & gutter, ITS Infrastructure, and accommodations for pedestrians and bicycles. Approximate project length is 5,300 LF.	
Justification	
Congestion Mitigation: The Cools Springs Area is a major employment area within middle TN. As development continues along Carothers Parkway so does the AADT on McEwen Drive. McEwen Drive is an important East / West Connector between Nolensville, La Vergne, Smyrna and Rutherford County. In the last few years the Board has approved 5.2 Million SF of Office, 450,000 SF of retail, 700 hotel rooms and 2,418 multifamily units at the Carothers and McEwen Intersection alone. This new roadway will help to significantly reduce congestion for commuters trying to access the Cool Springs area and should be coordinated with the City of Brentwood's planned extension of East McEwen Drive.	
Safety: This new roadway will be needed to reduce long term safety concerns on Clovercroft Roadway near the Breezeway School. These improvements should be coordinated with the City of Brentwood's planned extension of East McEwen Drive.	
Economic Development: The City has invested heavily in the Carothers McEwen area over the last few years. We are now seeing the private market invest millions of dollars into office and retail space along Carothers Parkway. These upgrades are needed to reduce congestion and improve safety so that we can retain and attract new businesses long term. These improvements should be coordinated with the City of Brentwood's planned extension of East McEwen Drive.

Category	Transportation
Priority	2 Star Project
Status	Pending

Description	Total Cost \$3,274,000
Reconstruction of intersection at Aspen Grove Drive and Seaboard Lane to allow for more efficient peak hour movements. Approximate project length of 1,000 LF.	
Project located in Collector Service Area 1.	
Justification	
Congestion Mitigation: Capacity at this intersection is at failure levels during both the AM and PM peak hours. The Board has funded a project for city staff to evaluate and make recommendations to the full BOMA on possible solutions.	
Safety: Pedestrian facilities should be incorporated into the intersection improvement project to comply with the Cities long range master plan.	
Economic Development: Redevelopment and future economic development along this corridor is possible. Upgrades are needed to reduce congestion so that we can retain and attract new businesses long term.

Description	Total Cost \$6,740,000
Reconstruction of intersection at Franklin Road (SR-6/US-31) and Mallory Station Road to allow for more efficient peak hour movements. Approximate project length of 1,000 LF.	
Project located in Collector Service Area 1.	
Justification	
Congestion Mitigation: Capacity at this intersection is approaching failures and it currently has significate peak hour delays.	
Safety: No existing safety concerns at this intersection. Pedestrian facilities should be incorporated to the intersection improvement to comply with the Cities master plan.	
Economic Development: Redevelopment and future economic development along this corridor is limited. This improvement is needed to maintain our high quality of life by reducing congestion and improving safety along this Major Arterial Roadway.

Status	Pending

Description	Total Cost \$26,290,984
Improvement of Carothers Parkway, from Long Lane to South Carothers Road. Widen from two (2) lanes to four (lane) median divided, with turn lanes as required.. Project shall include: access management (as allowable), curb & gutter, street lights, ITS Infrastructure, and accommodations for pedestrians and bicycles. Approximate project length of 14,500 LF.	

Justification
Congestion Mitigation: AADT on Carothers Parkway is expected to reach 25,000 VPD. The board has approved numerous developments in the South East section of the City. Approvals include approximately 2,663 Single Family Units, 2,004 Multi-Family Units, 1.8 Million SF in Retail and 3.4 Million SF in Office/Civic Development.
Safety: As traffic increases on Carothers Parkway access management will become increasing important to move vehicles and reduce accidents. This roadway should be constructed with a median to reduce conflict points and increase safety.
Economic Development: Redevelopment and future economic development along this corridor is limited. This improvement is needed to maintain our high quality of life by reducing congestion and improving safety along the Major Arterial Roadway.

Project #	ST16016
Project Name	Lewisburg Pike (Donaldson Crk Pkwy to SR-397)

Department	Streets
Contact	Engineering Director
Type	Improvement
Useful Life	20+
Category	Transportation
Priority	3 Star Project
Status	Pending

Description	Total Cost \$17,444,000
This section is to be constructed as a 4-lane, median divided roadway cross-section. The improvements are to also include curb and gutters, sidewalks, multiuse trail on the East Side and other appurtenances as required. The cost estimate does not include utility relocations required or right-of-way costs. Limits of construction are from Mack Hatcher Parkway to just south of Sullivan Farms Subdivision. Approximately 6,000 LF.	
Justification	
Congestion Mitigation: AADT on Lewisburg Pike is expected to reach 25,000 VPD. The board has approved numerous developments in the South East section of the City. Approvals include approximately 2,663 Single Family Units, 2,004 Multi-Family Units, 1.8 Million SF in Retail and 3.4 Million SF in Office/Civic Development.	
Safety: As traffic increases on Lewisburg Pike access management will become increasing important to move vehicles and reduce accidents. This roadway should be constructed with a median to reduce conflict points and increase safety.	
Economic Development: Redevelopment and future economic development along this corridor is limited. This improvement is needed to maintain our high quality of life by reducing congestion and improving safety along the Major Arterial Roadway.

Project #	ST16017
Project Name	Long Ln and Old Peytonsville Rd Connector

Department	Streets
Contact	Engineering Director
Type	Improvement
Useful Life	20+
Category	Transportation
Priority	3 Star Project
Status	Active

Description	Total Cost \$22,613,525
Included in the update to the Major Thoroughfare Plan are 2 crossings of I-65. This project is one of those crossings as is intended to connect Old Peytonsville Road with Long Lane. The main advantage of this crossing is to allow for traffic interconnectivity across I-65 without having to use Goose Creek By-Pass or Highway 96. Limits of construction are from Five Mile Creek Bridge to 500 feet east of Baskin Property. Approximately 2,500 LF.	
Project located in Collector Service Area 2.	

Justification
Congestion Mitigation: AADT on Carothers Parkway and Lewisburg Pike is expected to reach 25,000 VPD. The Board has approved numerous developments in the South East section of the City. Approvals include approximately 2,663 Single Family Units, 2,004 Multi-Family Units, 1.8 Million SF in Retail and 3.4 Million SF in Office/Civic Development. In addition TDOT has approved 7 traffic signals along Goose Creek Bypass. This option will provide an important alternative route to avoid future congestion.
Safety: As traffic increases on Carothers Parkway and Lewisburg Pike this roadway will become increasingly important. This connection will help reduce traffic on our arterial roadways and provide options to avoid future congestion at the Goose Creek Interchange.
Economic Development: This roadway will help future and existing businesses in the area by reducing congestion and making this an attractive place to live and work.

ST16017 - LONG LN. AND OLD PEYTONSVILLE RD. CONNECTOR

Project #	ST16018
Project Name	S. Margin St. Infastructure Upgrades

Department Streets
Contact Engineering Director
Type Improvement
Useful Life 20+
Category Transportation
Priority 4 Star Project
Status Pending

Description	Total Cost \$9,358,400
<p>This project is to upgrade Sanitary Sewer, Water and Stormwater infrastructure in our historic downtown area. We are having issues with all utilities along this corridor and they are in need of upgrades and replacement.</p> <p>The existing stormwater system mainly consists of a series of intermittent roadside ditches and culverts. This area has been a problem since the early 90's with no improvements made. The roadways lack drainage infrastructure. This infrastructure is needed to help protect localized flooding during heavy rain events. This project would also include the install of a water quality feature at the Harpeth River. The goal is to extend infrastructure into the Parkview Area to address localized flooding</p> <p>Project located in Collector Service Area 1 and 2.</p>	
Justification	
<p>Congestion Mitigation: Congestion along S. Margin Street is very heavy during peak hours and events. This project would not increase vehicular capacity but would provide need and key pedestrian connections within our historic downtown area.</p> <p>Safety: Providing sidewalks and street lights in our historic downtown area will help ensure our downtown remains a safe and walkable community.</p>

Description	Total Cost \$13,356,000
Complete the widening of North Royal Oaks Bolevar, a major arterial street, as a four (4) lane cross section with sidewalks, street lighting and other required appurtenances. Limits of construction are Alexander Plz to Liberty Pike. Approximate project length of 4,000 LF.	
Justification	
This is the one remaining area that needs to be widen from two (2) to four (4) lanes. When this project is complete, we will have a four (4) lane arterial roadway from Mack Hatcher Parkway (SR-397) to Moores Lane (SR-441) that parallels I-65.

Project Name	SR96W Multiuse Trail (Vera Valley Dr-5th Ave N)

Department Streets
Contact Engineering Director
Type Improvement
Useful Life 20+
Category Transportation
Priority 2 Star Project
Status Active

Description	Total Cost \$5,570,411
Extend ten (10) foot multi-use trail from Vera Valley Drive to 9th Avenue in Downtown Franklin. Approximate project length is 5,800 LF.	

Justification
This project will provide pedestrian, bicycling access to Freedom Middle School, Freedom Intermediate School from the neighborhoods surrounding Hwy 96 West. Two other schools exist within the vicinity of this trail – Poplar Grove School and Johnson Elementary. Students from these two schools will also benefit as they will have access to this trail (if it is constructed). Also, Jim Warren Park, three subdivisions (Clairemonte, Spencer Hall, West Field Estates) and two churches (The Church of West Franklin, The Kingdom Hall of Jehovah’s Witness) and a Fire Station are located along SR 96, within this project vicinity.

ST16022 - CAROTHERS PKWY. (LONG LN. - FALCON CREEK)

Project #	ST16023
Project Name	1st Ave Multiuse Trail (S Margin St - Bridge St)

Department	Streets
Contact	Engineering Director
Type	Improvement
Useful Life	20+
Category	Transportation
Priority	2 Star Project
Status	Pending

Description	Total Cost \$3,206,400
This project would connect Pinkerton Park, Historic downtown Franklin and would eventually be extended to Bicentennial Park. Construction would include a 12' wide multipurpose trail on the east side of 1st Ave.	
Justification	
This project was identified as a short term project as part of the CTNP.

Project Name	Mack Hatcher Multiuse Trail (Franklin-Hillsboro)

Department Streets
Contact Engineering Director
Type Improvement
Useful Life 20+
Category Transportation
Priority 3 Star Project
Status Pending

Description	Total Cost \$3,600,000
The Mack Hatcher Parkway (SR-397) has been designed with a multi-use path on the south side of the road. A 12' multi-use path exists from Franklin Road to Daniel McMahon Lane.	
Justification	
In order to complete this pedestrian network so there is a complete network around this major corridor, the completion of a multi-use path from Hillsboro Road to Daniel McMahon Lane is necessary.

ST16024 - MACK HATCHER PKWY. MULTI-USE TRAIL (FRANKLIN RD. - HILLSBORO RD.)

Project #	ST16025
Project Name	Oxford Glen Dr Multiuse Trail (Day Lily - McEwen)

Department Streets
Contact Engineering Director
Type Improvement
Useful Life 20+
Category Transportation
Priority 2 Star Project
Status Pending

Description	Total Cost \$2,079,450
12' Wide multi-use trail to provide pedestrian access and benefit the neighborhoods in the area.	
Justification	
The northern section of Oxford Glen Drive from McEwen Drive to Liberty Pike already has bike lanes, however the right-of-way has enough room for the construction of a 12' wide multi-use trail. This trail will connect to the proposed trail system on McEwen Drive.

ST16025 - OXFORD GLEN DR. MULTI-USE TRAIL (DAY LILY - MCEWEN DR.)

Project #	ST16027
Project Name	Boyd Mill Ave (Downs Blvd - SR96W)

Department Streets
Contact Engineering Director
Type Improvement
Useful Life 20+
Category Transportation
Priority 1 Star Project
Status Active

Description	Total Cost \$6,157,656
Boyd Mill Avenue is a major collector that needs to be upgraded to City standards. The upgrad will occur from Highway 96 West (SR-96W) to Downs Blvd). This project would include two 12' travel lanes, turn lanes as requiried, bike lanes, curb and gutter, sidewalks and street lights. Project located in Collector Service Area 3	
Justification	
Boyd Mill is a key residential roadway that moves residents from their neighborhood to Highway 96 so they can access the larger network and get through the city or to the interstate. In addition this roadway provide connectivity to the existing park facilities.

Description	Total Cost \$20,896,000
Upgrade Clovercroft Roadway to include 3 lanes, curb and gutter, 12' trail on the north side, sidewalk on the south side, and drainage improvements.	
Project located in Collector Service Area 1	
Justification	
Clovercroft Road is proposed to be upgraded to City standards from Murfreesboro Road (SR-96) to Oxford Glen Drive. This is a key section of road that connects neighborhoods to Murfreesboro Road and to Oxford Glen which provides connections into the Cool Springs Area and I-65.

Description	Total Cost \$15,742,800
Columbia Avenue, a major arterial will be widened from 2 to 3 lanes from Fowlkes Street to Downs Boulevard.	
Justification	
This roadway is an important part of the Downtown grid network. Columbia Avenue is one of the major corridors used to get downtown and it carries both car and truck traffic. There will be increased pressure on the City to improve this corridor as the Carter's Hill Battlefield Park develops out over the next few years.

Project #	ST19001
Project Name	Main St Sidewalk Repair Project

Department	Streets
Contact	Engineering Director
Type	Maintenance
Useful Life	20+
Category	Transportation
Priority	4 Star Project
Status	Pending

Description

Total Cost \$2,200,000

Main Streets Streetscape project was completed in the early 90's. The existing brick pavers are faded and uneven creating numerous ADA issues along our main street. In addition, the tree grates need to be replaced. Staff is proposing to replace all the brick pavers and crosswalks to bring Main Street up to current standards.

Justification

The Street Department spends a significant amount of funding annually to maintain and fix the brick pavers located in the sidewalk and crosswalks. This project would decrease long term maintenance and decrease the number of ADA issues that occur on an annual basis.

Description	Total Cost \$3,500,000
Identified in the 2010 Greenway and Open Space Master Plan and CTNP. Construct a multipurpose 12' wide for .83-miles from the entrance of Carriage Park proceeding north on to Eastern Flank Battlefield Park property. The trail would be constructed on City park property located in front of the existing split log fence and continue north to Collins Farm. The pathway would cease prior to the existing CSX crossing.	
Justification	
The trail Connection project is located in Quadrant 3 within the Parkland Impact Fee Ordinance. The trail-greenway connection is identified in the Greenway and Open Space Master Plan and CTNP.
