SUBJECT:
Consideration of Resolution 2018-23, "A Resolution Authorizing Condemnation for the Acquisition of Property for the Henpeck Lane Sanitary Sewer Project". (4/27/2018 CIC 3-0)

Purpose

The purpose of this memorandum is to provide information to the Franklin Board of Mayor and Aldermen (BOMA) concerning the Henpeck Lane Sanitary Sewer Extension Project.

Background

Oak View Elementary School, located on Henpeck Lane, was constructed in 1993. The school is located just outside the Franklin city limits and is served by a small onsite sanitary sewer system, commonly referred to as a "package plant." In addition to the Oak View Elementary site, Williamson County Schools (WCS) owns approximately 35 acres of land that has been identified as a potential site for a new middle school (grades 6th through 8th). The new middle school, which is expected to open in the fall of 2020, is estimated to cost approximately \$40 million and would house approximately 900 students.

To make this site viable, it is necessary to extend the City of Franklin's sanitary sewer services to this site. Both the new middle school and Oak View Elementary would be placed on the City's sanitary sewer system. The

project generally consists of a 4,800 linear foot extension of a 12" gravity sanitary sewer main from the Five Mile Interceptor, which is located in the Goose Creek Sanitary Sewer Basin. The proposed sewer main will be installed in the Ellington Park Subdivision and extended to the west across Lewisburg Pike to the Oak View Elementary property line. The estimated cost for the extension of the sanitary sewer line extension is \$2.36 million.

The City of Franklin has agreed to design, acquire the right-of-way, and construct the proposed sewer interceptor. Acquisition of easements will be required on approximately 26 tracts.

Financial Impact

No financial impact.

Recommendation

Staff recommends approval of Resolution 2018-23.
