Mark Hilty, Assistant City Administrator - Public Works  
Michelle Hatcher, Water Management Director

**SUBJECT:**

\*Consideration of a Professional Services Agreement with Bowker & Associates, Incorporated, Consulting Engineers (COF Contract No. 2018-0140), for a Comprehensive Assessment of Odor Emissions and Their Control in the Franklin, TN Wastewater Collection and Treatment System in an Amount Not-to-Exceed \$40,740.00. (Deferred from 6/28/18 CIC)

**Purpose**

The purpose of this memorandum is to provide information to the Franklin Board of Mayor and Aldermen (BOMA) concerning potential odor emissions that are reported by residents on the western side of town, near the Water Reclamation Facility (WRF) and surrounding pump stations.

**Background**

Odor complaints have been received from residents around the WRF indicating the surrounding facilities may be contributing to potential odor emissions. The Water Management Department has responded to these complaints each time they have been received; however, odors often quickly dissipate and are undetectable.

This study will scientifically evaluate the potential for odor emissions from the WRF and surrounding areas that may be contributing to these complaints. The consultant will collect field data, analyze and interpret the data, and provide a report summarizing any potential recommendations for improvement.

**Financial Impact**

The study cost is \$40,740 and is included in the FY19 budget. Work will not commence until the budget is approved, however the PSA needs approval prior to the beginning of the fiscal year so work can begin this summer.

**Recommendation**

Staff recommends approval of the contract with Bowker and Associates for the odor emissions study.
