**File #:** 19-0570, **Version:** 1

---

**DATE:** May 13, 2019

**TO:** Board of Mayor and Aldermen

**FROM:** Eric Stuckey, City Administrator  
Paul P. Holzen, City Engineer/Director of Engineering

**SUBJECT:**

A Relocation Agreement between Middle Tennessee Electric Membership Corporation (MTEMC) and the City of Franklin (COF Contract 2019-0166) for the City of Franklin's SR-96 W Greenway Project.

**Purpose**

The purpose of this memo is to provide information to the Franklin Board of Mayor and Aldermen (BOMA) concerning COF Contract No. 2019-0166 with MTEMC.

**Background**

The construction of the SR-96 West Multi-Use Trail, between Vera Valley Drive and 5<sup>TH</sup> Avenue North, will require the relocation of MTEMC infrastructure. As is typical with utility relocations, the utility provider funds the relocation of any conflicting utilities that are within the *existing* right-of-way. The City or State is then responsible for the cost to relocated utilities *outside of existing* right-of-way. With this project, the cost split for relocation of electrical infrastructure is 81.8% to MTEMC and 18.2% to the City. The City's estimated cost amounts to \$7,186.98. While the percentage of the cost split should not change, the actual amount may change due to actual construction costs.

**Financial Impact**

The current *estimated* financial impact to the City is \$7,186.98. However, this cost may change due to actual construction costs. This expense will be incorporated into the overall project budget.

**Recommendation**

This contract was approved by the City Administrator under authority granted by the BOMA.
